Release Notes
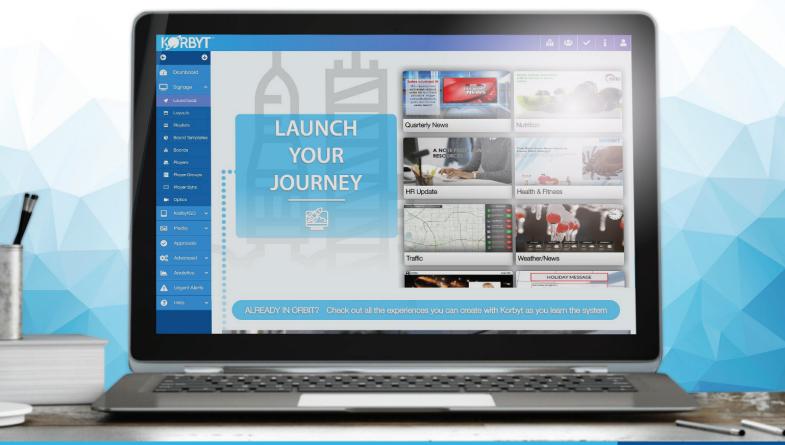

Korbyt® 1.7 Release - June 19, 2019

What's New in Korbyt® 1.7?

On June 19, 2018, a set of new features and enhancements was released in the Korbyt 1.7 platform update. For Korbyt® Digital Signage, KorbytGO™ Mobile, and Korbyt® Inview, new features and functionality were introduced to enhance usability, increase user engagement and sustain our platform as the best in market.

We listen to our customers and pay close attention to market demands. The Korbyt 1.7 release specifically addresses some of the most in-demand enhancement requests heard from administrators and end-users alike.

Korbyt® 1.7 New Features and Enhancements

1. **Multi-Factor Authentication (MFA):** optional security add-on enabling two-phase authentication using an SMS code as the secondary layer to access Korbyt®

2. **Zoom to Fit Button:** 'Zoom to Fit' button added to Builder to set optimal canvas size while building and editing content

3. **Media Library Picker:** enhanced media library picker to improve the user experience with image and video content additions

4. **Crossfade Transitions:** new transitional features added for use with carousel element and between playlist content

5. **Hospitality Meeting Display Element:** new visual element for content creators that will help showcase rooms and events

6. **Orientation Lock:** ability to lock Portrait or Landscape orientation in Messages being sent to KorbytGO™ added for improved content sharing

7. **Sonar:** optional feature add-on allowing a user to embed elements from KorbytGO™ to their company mobile apps or webpage

8. **Custom Code File Storage:** ability to store and access complete JS and CSS files across a user's tenant for use in Message and Layout construction

9. **Content Card Views:** added support of thumbnail card view for urgent alerts and predefined layouts/messages

10. **Playlist Card Preview:** addition of animated thumbnail to preview playlist contents on cards

11. **Player Page Improvements:** implementation of new 'Upgrade Player' experience and new UI for player actions

12. **Playlist Shuffle:** new feature that allows for optional shuffle of Dynamic Playlist

13. **Player Status Notifications:** functionality that allows users to be notified by SMS if players are down or provisioned

14. **Mobile Notifier:** optional feature add-on for KorbytGO™ users to receive app notifications about changes in their adapters and data flow

15. **Improved Player Reports:** enhanced player reporting features to learn about player changes

16. **Audit Trail Report:** enhanced reporting to learn about changes made in the CMS in a consolidated view
