

# KORBYT<sup>®</sup> PRODUCT SHEET

## FEATURING **KOMPASS**

### KOMPASS

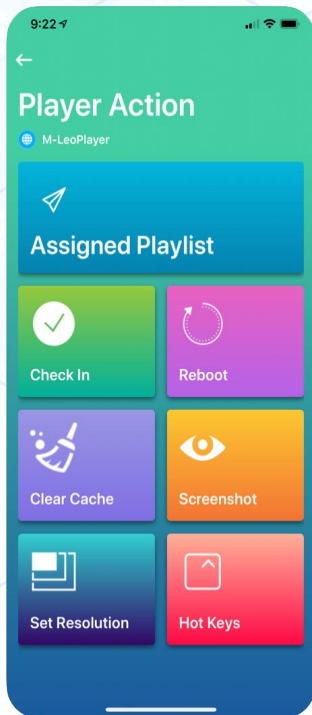

A standalone Korbyt app that allows for remote media player troubleshooting and configuration. Download this app for access to player and player groups in Korbyt on-the-go, so admins can conveniently troubleshoot or change settings from the player location.

**Login:** Easy access to Player Lists, Player Actions and Player Provisioning without having to login to the full Korbyt portal.

**Player Provision:** Quickly provision new players from the app by scanning the QR code from the provisioning screen of new players to add them to the Korbyt platform.

**Player List:** Select from a list of players or player groups to work with from the app.

**Player Action:** Select from a list of player actions and troubleshoot from the app.

### Featured Highlights

**Assigned Playlist:** Review and manage the playlist assigned to specific player from the app.

**Check-In:** Remotely force the player to look for updates or content changes waiting to be downloaded to the media player.

**Reboot:** Instantly send a reboot command to your players with the touch of a button from the app.

**Clear Cache:** Delete/clear all locally stored content and resources from the player and download fresh versions from the cloud.

**Resolution:** Edit player resolution from the app to ensure it matches the display resolution.

**Screenshot:** Quickly request a new screenshot from the app of content running live on screens after player changes have been made.

**Hot Keys:** More commands normally sent to the player through keyboard keystrokes.

- Show player info overlay on the screen.
- Restart the Korbyt application on the player.
- Set orientation of the player to match the display orientation.
- Toggle the debug window for troubleshooting.
